

SIGGESTIONS FOR A SCIENTIFIC MODEL FOR A BUSINESS THESIS

I suggest, if possible, that the paper written, so that the following points are easily visible:

1. Intro
2. Problem statement
3. About existing solutions of the problem (from the open literature), and what are their drawbacks, from the point of view of interest for this research.
4. What is the essence of the proposed solution, and why that solution should not suffer from the above specified drawbacks.
5. Details of the solutions to be compared (the best one from the open literature and the one proposed in this paper)
6. Conditions and assumptions of the analysis to follow
7. Math analysis
8. Simulation analysis
9. Implementation analysis
10. Conclusion

Please make the references, so they are in the IEEE standard format...All these suggestions will help your paper a lot! Good luck!
